DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 7/22/03 has been entered.

Claims 1-13 are pending and are considered on the merits.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

Claims 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "incidental...pathologies". This is indefinite because the term, "incidental pathologies" has not been defined in the specification and is not a term of art.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action: A person shall be entitled to a patent unless (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent, (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Brancato *et al.* [IDS].

The claims are directed to the topical application to the eye a composition comprising CoQ10 for prevention and treatment of incidental or post-surgical trauma pathologies of the anterior chamber of the eye.

The reference is relied upon as explained below.

Art Unit: 1651

Brancato *et al.* disclose a method of application of CoQ10 to prevent haze formation in PRK surgery (p. 36). The CoQ10 formulation disclosed in Materials and Methods is dissolved in Lutrol F107 (page 33).
